

Testimonials: Fertility

Let me start by introducing myself. My name is Ted A.; I have been married for three years and have been trying to father a child.

After two years of unsuccessful attempts I decided it was time for a check up. I went to the hospital and had a sperm analysis. The results revealed that my count was 797,000, well below the 30,000,000 of the average healthy male.

I was sent to an urologist and given medication that only made me sick and didn't help my situation. After being told that I could never produce a child it was time to see my good friend Master Hou.

Master Hou told me that he could help me. I was a bit skeptical but after four months of treatment I went back to the fertility clinic for another sperm analysis. I received the results the same day and to everyone's amazement my count had gone up over 17 X's for a total count of 17,000,000. The woman at the fertility clinic said she had never seen such an improvement in such a short period of time.

I would recommend this non invasive non-pharmacological treatment to anyone, it has given me new hope and as my wife now says you are a man. **THANK YOU MASTER HOU.**
