

Testimonials: Vision Disorders, Eye Injury

I was seen by Master Hou after a central vein occlusion left me blind in my right eye. Neither of the two retinologists, one from Wills Eye Institute and one from Scherie Eye had offered me any hope of ever seeing again. I refused to accept this. After his first treatment, Master Hou gave me his unsolicited diagnosis that I would be able to see.

Now it is seven months later and two weeks ago my retinologist told me if he hadn't seen my eye previously, he would never believe I had had a CVO. My eye is normal now – no swelling, no traces of blood from the hemorrhage that had occurred. My corrected vision is 20/60 and improving. “Unbelievable” according to my retinologist.
